Web Dev SMP
Assignment

Assignment Description–

Make a login/register page that has the following fields-

- Username
- Email
- Password
- Date of Birth
- Age
- A radio button with values(options)-
    1. basic
    2. intermediate
    3. expert
- A checkbox to select known programming languages.
- Any dummy field which had to be hidden from the user.
1. Use proper heading tags for heading.
2. Use <p> tags for description.
3. Mentioning ID and name attributes is a must (no need to mention id for container or label element)
4. You can use semantic tags for defining the purpose of the element.
5. Using a header and footer will be a plus.

Example–

Register yourself
